

**Contents ..... 9-11**

Explanations and abbreviations ..... 13  
 The conception of  $\pi$  ..... 14  
 Definition of the squaring form ..... 14  
 Unique illustration

**Chapter 1** ..... 15-19  
 Definition of Squares ..... 16-18  
 Gradation system I ..... 16,18  
 A unique square ..... 19  
 The square-squaring form... ..... 19

**Chapter 2** ..... 21-25  
 Definition of circles ..... 22-25

**Chapter 3** ..... 27-35  
 Definition of cylinders ..... 28-33  
 Gradation system III..... 34  
 A unique cylinder..... 35  
 The cylinder-squaring form ..... 35

**Chapter 4** ..... 37-52  
 .cy definition ..... 38-40  
 Formula construction ..... 40-42  
 Absolute values... ..... 43-44  
 Logarithm e used as an aid ..... 44-46  
 Application of formulae ..... 47-52

**Chapter 5** ..... 53-70  
 Circle squaring ..... 54-60  
 Grading systems I and II ..... 55-56  
 Squares have three different circles ..... 57-64  
 Circle-squaring form ..... 58-59  
 A unique circle ..... 60-62  
 And thus the diameter and radius..... 61-62

Area and perimeter of square with inner circle .....	63-65
Area and perimeter of a square and circle with same circumference.....	65-67
Relationship between a square and a circle .....	65-67
Summary of the circle-squaring form .....	68-69
Summary of formulae .....	70
<b>Chapter 6</b> .....	71-80
Document for the number 3.141592653 .....	72-73
Grading system II.....	74
3.141 belongs to square in group 1 .....	75
3.141 belongs to cylinder in group 3.....	76-77
Note the consequences of $M$ and $\pi$ .....	78-79
Conclusion .....	80
<b>Chapter 7</b> .....	81-125
Practice and application .....	82
Explanations.....	82
Squaring formulae.....	83
Application.....	84-85
Group 3 values applied, illustrated with diagrams.....	86-97
Group 2 values applied, illustrated with diagrams.....	98
Group 1 values applied, illustrated with diagrams.....	99-107
Size order .....	108-110
Only cylinder 3.125 and cylinder 3.14.....	111-114
The three unique diagrams $M$ , $R$ and $B$ .....	115-117
Principle of same perimeter .....	118-120
Principle of same area .....	121-125
Conclusion Correct Values for a Circle	
New mathematical formulae .....	127-161
Radius ... ..	129-131
Shaded area .....	133-136
Arch.....	137-141
Star .....	143-148

Parablex.....	149-153
Relationships between cubes, cylinders and spheres .....	155-158
With the aid of $M$ , $R$ , $B$ and $H$ .....	159
Appendix.....	161-178
Square grouping and grading system 1 .....	161-162
Unique geometric diagrams .....	163
Cylinders in three groups .....	164
Grading system 3 & 2 .....	165-167
Formulae .....	169
Notes on values $M$ and $\pi$ .....	169-178
All diagrams on pp 83-109 for better overview .....	170-171
Squares in the formulae and their values .....	174-178
Formulae for outer circles, inner circles, squares and circles with the same perimeter and area .....	177
Approximate values .....	178
